Portfolio: rukon.dev

Career Summary:

- IT Systems & Operations Lead · Web Developer · Software Specialist with hands-on experience across business IT operations, software systems, web development, and technical support.
- Experienced in supporting internal business systems, troubleshooting hardware/software issues, configuring systems, maintaining IT equipment, and resolving day-to-day operational problems.
- Experienced in business web development and maintenance, including WordPress, Elementor, WooCommerce, responsive interfaces, updates, and technical troubleshooting.
- Built practical software around real operational workflows, including RPOMS, a WMS/ERP-like operational system for inventory, device, delivery, usage, and related business processes.
- Developed ResearchForge as a University Project for BIT4543 Artificial Intelligence, handling documentation, planning, architecture, development, testing, deployment, debugging, and maintenance.
- Hands-on with Python, FastAPI, Next.js, PostgreSQL, Row Level Security, structured AI output validation, testing, deployment, and production problem solving.
- Certified in Google IT Support and C/C++ Specialization through Coursera, with continued development across software, web, systems, and AI technologies.

Key Proficiencies:

- IT Systems & Operations: business system support, monitoring, maintenance, troubleshooting, deployment and operational issue resolution
- Software & Web Development: application logic, business workflows, dashboards, responsive interfaces, WordPress, Elementor and WooCommerce
- Frontend & Backend: Next.js, Python, FastAPI, APIs and frontend/backend integration
- Database & Security: PostgreSQL, Row Level Security (RLS), authorization and per-user data isolation
- AI, Testing & Deployment: research-paper processing, structured output/schema validation, backend/frontend testing, offline testing and Vercel deployment
- Technical Support: hardware/software troubleshooting, system installation, PC/peripheral support, configuration and user assistance
- IT Support & Troubleshooting: Hardware & Software issue resolution, mobile & PC maintenance
- Hardware & Software Technician: Mac and Windows PC/laptop diagnostics, OS installation, software setup, hardware repair, component replacement, peripherals, networking, system configuration, maintenance and troubleshooting

Experience & Activities

- **IT Systems & Operations Lead · Web Developer · Software Specialist, Blue Bee Technologies Sdn. Bhd., Cyberjaya**
Support and maintain internal business systems and day-to-day IT operations; handle software/hardware troubleshooting, system configuration, deployment, maintenance, user support, and web-related technical operations.
- **RPOMS: WMS/ERP-like Operational System**
Designed and developed a real-world WMS/ERP-like operational system for one of Malaysia's leading telecommunications and technology giants through EARTH, covering system architecture, inventory/asset management, router/device workflows, charger deductions, delivery/usage tracking, dashboards, data relationships, and operational logic.
- **EARTH: Business Web Development**
Developed and maintained business web solutions for EARTH under the wider Blue Bee environment, covering responsive frontend implementation, WordPress/CMS, Elementor, WooCommerce/e-commerce, integrations, deployment, updates, and technical maintenance.
- **BBTech: IT & Operations**
Handled Mac and Windows hardware/software support, troubleshooting, OS and software installation, system configuration, maintenance, and peripheral/networking issues. Managed day-to-day operational workflows including quality control, inventory management, product listing, order preparation, packaging, and stock handling. Built and maintained an internal Microsoft Excel tracking system for operational data and workflow management, later followed by development of a separate web-based system..
- **ResearchForge: Developer, University Project**
University of Cyberjaya · BIT4543 Artificial Intelligence · 2026
Designed and implemented the system end-to-end, covering architecture, Next.js frontend, Python/FastAPI backend, PostgreSQL, AI integration, RLS-based data isolation, schema validation, automated testing, Vercel deployment, debugging, and maintenance.
- **Technical Management, UoC IT Society, University of Cyberjaya**
Assisted with technical planning, coordination, and on-site IT support for university events.

Academic Qualification:

University of Cyberjaya, Cyberjaya, Selangor, MY

Bachelor's in Information Technology (IT)

Expected Graduation Year: 2027

Daffodil International University, Savar, Dhaka, BD

Bachelor's in Computer Science & Engineering (CSE)

Fall 2024, Completed 1 semester

Milestone College, Uttara, Dhaka, BD

Higher Secondary in Science Background

Year: 2023

Professional Development:

- Actively participated in IT-focused seminars, workshops, and professional events covering cybersecurity, AI, cloud computing, and related technology topics.

Training:

- **Google IT Support Specialization – Coursera**
Networking, system administration, IT security, troubleshooting, and technical support fundamentals.
- **Coding for Everyone: C and C++ Specialization – Coursera**
Programming fundamentals, syntax, problem solving, and logic building using C and C++.

Volunteer Activities:

- **E-Waste Collection Volunteer: UOC Sustainable Week 2024 and 2025**
Participated in electronic-waste collection and awareness activities focused on responsible e-waste management.
- **Flood Relief Volunteer: Sherpur, Mymensingh, Bangladesh (2024)**
Led fundraising efforts supporting 90 families and created community-focused content to encourage aid.

Soft Skill: Teamwork, Communication, Leadership, Negotiation, Problem-Solving, Adaptability, Organization

Computer Skill: Microsoft Word, Excel & PowerPoint; general technical and computer skills

Language: Fluent in English ,Bengali , Hindi and Urdu.
